- YS-CO008 Fluorescent Light Assembly
- YS-CO016 Scale Stand Wall Mounted
- YS-CO020 Organ Rinse Basket
- YS-CO022 Evidence Screen
- YS-BL800 1 HP Disposal

The YS-CC100 wall mounted center approach autopsy sink provides all of the features normally found in a typical pedestal type autopsy table without the space requirements. The autopsy cart overhangs the autopsy station allowing fluids to drain directly into the sink. On each side of the sink are dissection areas of equal size

The dissection area includes grid plates which are elevated above a sloped surface that drain directly into the sink. Wall mounted design allows for easy floor cleaning.
