

YORLAB AUTOPSY CARTS

YL-DA100

YL-DA100 (consists of chassis, YL-DA000, and autopsy top, YL-GA100)

The YL-DA Series autopsy carts are used in conjunction with wall mounted autopsy sinks. The frame is rigid with a built in slope allowing for fluid drainage into the autopsy sink. The downward sloped edge of the cart frame will latch onto the C Series sink if needed.

The YL-DA Series feature heavy-duty 8" (200mm) diameter non-corrosive powder coated wheels. During transport, one caster is swivel locked for easy mobility. When inactive, the casters can be locked in place.

DA Series Standard Features

Cart Top: Fabricated of stainless steel with matte finish. The top is recessed and dimpled toward the drain hole. A drain plug on a chain is provided. All exposed welds are ground smooth and grained to match a matte Finish. YORLAB provides multiple style cart tops that will fit the YL-DA Series Autopsy Carts.

YL-DA000 Chassis only
